| 4                       | This is a deliberately very long single-line material description intended to stress the wrapping behaviour of the description column at its allocated 30 percent width, to prove that text wraps instead of overflowing or truncating in the rendered PDF output. | This is a deliberately very long specification string that must wrap across several lines inside the 16 percent specification column without clipping, bleeding into the adjacent make brand column, or breaking the row layout. | 2                     | lot     | Generic Import    | 150000  | 185000.5 | 70001  |
